

Two-Day Basic Facilitation Workshop *In Houston, TX*

**There will be 2 tracks: One for Beginning Level Carpet Work and another for Advanced Level Carpet Work.
Led by Greg Huston and Judson Poling**

- We will cover the basic outline and theory of carpet-work processes, safety procedures, and understanding facilitation "shadows".
- You will get practical experience running complete basic processes from start to finish. If you've never facilitated a carpet-work process, this is a great place to begin learning how to do that in a low-risk environment.
- If you have some experience in doing carpet-work at a beginning level, this workshop will give you "hands on" training and feedback so you can take your next step in learning to facilitate.
- For those who have had a basic facilitation training experience, this training will feature an advanced track where you will learn how to facilitate advanced processes.
- The training will also be a chance for a few who bring an issue to work on to get help with that issue as we facilitate you in a training/learning environment.

This training is for both men and women.
